

Why would the FCC ever consider creating rules that would reduce or change the right of free speech provided by the first amendment? I travel 3 to 4 days per month. I consider XM radio not only a pleasant experience but it provides an environment that I truly feel adds to my safety as I travel between several states. Instant road and weather information. XM radio is a known resource of entertainment that reduces the stress level of long trips. Broadcasters are only worried about their money trail and providing maximum exposure of their sponsors products. Change is healthy. I am apposed to HR 4026.
